

# CONTRACT ESTIMATORS

CONSTRUCTION ESTIMATING SERVICES

## COMPANY PROFILE

PROVIDING ESTIMATORS FOR THE CONSTRUCTION INDUSTRY.

## ABOUT US

**CONTRACT ESTIMATORS** provides a reliable Estimating Service for the resource and commercial construction industries.

Based in Perth Western Australia, Contract Estimators has developed a solid reputation for providing an accurate and industry leading service. Their vast construction experience has been developed through working with large resource or construction companies through to smaller subcontractors.

Explore the website to learn more about Contract Estimators profile and services.

## PROFILE

**CONTRACT ESTIMATORS** was established in January 2010 and has quickly established a solid reputation and strong commercial relationships by providing quality estimating services.

Contract Estimators ensures a level of personal attention from initial client brief through to final delivery.

Contract Estimators operates under three fundamental values:

1. Responsiveness – The first priority is to understand the clients requirements. This involves providing a proactive approach by planning effectively and applying resources rationally.

2. Best Practice – After the initial client brief and establishing a clear scope of work, Contract Estimators bring the following to each estimate:

- vast industry expertise
- strategic and business objectives
- risk minimization
- sound judgement
- clear communication.

3. Ethics – Contract Estimators has a strong culture which makes confidentiality, fairness and ethical decision making a priority.

Contract Estimators has a commitment to excellence which begins with hiring exceptional people. This is reinforced by internal procedures which includes comprehensive review of all estimates.

## SERVICES

**CONTRACT ESTIMATORS** supplies estimators to the resource and commercial construction industries in the following disciplines:

- Bulk Earthworks
- Concrete Works
- Building Works
- Drainage
- Structural, Mechanical and Piping
- Electrical and Instrumentation

Contract Estimators provide a complete estimate using 'first principle' estimating techniques that include the following:

- Direct cost pricing showing materials, plant, labour and subcontract breakdown
- Overhead makeup and structure
- Risk and opportunity analysis
- Escalation
- Cashflow
